About UltimoSoft

Ultimo Software Solutions is an Enterprise Application services provider that helps organizations by efficiently designing and deploying IT Solutions. From strategy, architecture, and design to system integration, UltimoSoft works with clients to identify and realize opportunities to increase their return on investment, improve productivity, and enhance their relationships with customers, employees, and partners.

It's our business to help **your** business stay ahead of the competition. Our team of senior consultants – Strategists, Brand Developers, User Intelligence Specialists, Content Creators, Designers, Information Architects, Interface Developers, Technologists, Network and Security Specialists and Data Architects – are at your service with dedication and expertise.

Technology Without Bias

When you choose UltimoSoft, you are going to receive solutions and services that are tailored without a bias towards a particular platform or technology. We are devoted to providing development in best practices and best-of-breed solutions that assure delivery of easy maintainability and reusable components for any future upgrades. Therefore, we base recommendations only on what is right for your precise business needs, without constraints imposed by a predetermined vendor.

Robust Capabilities

UltimoSoft offers depth of expertise in multiple industries, including banking and financial services, media and entertainment, information technology and communications, retail and consumer products, healthcare, and manufacturing.

In 2003, Ultimo Software Solutions Inc. was incorporated in the State of California with a vision to be a vital, comprehensive technology-based consulting company dedicated to excellence – a compassionate and caring organization with a vision to be a top-class Global IT Services company. Since its incorporation, UltimoSoft has become one of the fastest-growing companies in the United States, with operations in almost all major states of the U.S. and in Canada, Mexico, Europe, India, and ASEAN countries.

UltimoSoft Industry Solutions

UltimoSoft is committed to customer satisfaction. We take exceptional pride in offering our customers personalized service from our versatile, experienced specialists. From scope, assessment work and implementations, to staff training and knowledge transfer, our comprehensive portfolio of services mean professionalism and value every step of the way.

UltimoSoft has implemented end-to-end integration services across diverse verticals, helping customers maximize return on investment, reduce risks, cut delivery times and slash operating costs. We have created a substantive track record of success in bringing our proven SOA, BPM, and B2B methodology and deep-knowledge expertise to clients in:

Supply Chain Management

UltimoSoft specializes in providing supply chain assessments based on your business requirements and bottom-line goals. We can fine-tune your existing tools, integrate additional key components, or implement a brand new solution that provides you with enterprise-wide flexibility and precision from materials provisioning to order delivery – and every step in-between:

- Real-time visibility of market patterns
- Customer demand
- Supplier data transactions and warehouse inventory
- Distribution at home or through overseas operations.

Telecommunications

Telecommunications integration poses complex business problems in SOA infrastructure, multi-vendor input frameworks, and comprehensive, enterprise-wide service delivery. UltimoSoft solutions go beyond enabling sales and service applications. We provide extensive data migration, re-engineering for contemporary platforms and efficient connectivity between legacy hardware and innovative systems – all without sacrificing the client's invested resources.

Energy and Utilities

UltimoSoft can help companies gain traction through real-time reporting of their financial positions and operational capabilities. Managers need instant perspective on price spikes (peaks and valleys), the positions of trading counter parties, and effective risk management solutions that they can bring to bear in an aggressive marketplace.

UltimoSoft also helps utility companies maintain back-office operations, integrating customer support, service request and fulfillment, accounting and billing, and digital and paper correspondence.

Financials

UltimoSoft assists banks, insurance companies, and investment companies in implementing SOA and BPM solutions that integrate CRM with internal operational snapshots and sales operations. UltimoSoft provides a personalized solution for your needs in front office, underwriting, billing, and testing. We'll help you meet compliance regulations, retain customer loyalty, and improve efficiency across your entire organization.

Healthcare

UltimoSoft has the expertise and in-depth knowledge to build IT solutions tailor made for the Healthcare industry. UltimoSoft can ensure proper claims submission, claims processing and adjudication while complying with the HIPAA & HL7 regulations. Our Healthcare solutions address the issues of:

- Consistency
- Accuracy and quality of claims processing
- SLA compliance
- Real time & dynamic reporting to give visibility into operations
- Management control and visibility of work distribution
- Claim audit trail
- Claim control from the time of receipt to the time of realization
- Optimize work prioritization and assignments.

We provide a complete B2B integration road map for our Healthcare solutions – from identifying partner agreements, architecting and developing B2B interfaces, to transaction tracking, and error handling, certifying, testing, rollout and support strategy while ensuring HIPAA and HL7 compliance.

UltimoSoft Solutions

UltimoSoft merges industry-standard methodologies with state of technology best-practices in planning, implementation, and augmentation training to deliver world-class customer service and client-tailored SOA, CLEH, EAI, B2B, BPM, AJAX Rich Internet Applications, and User Interface solutions to its customers.

Our UltimoSoft Errorspot CLEH solution provides a state-of-art, customizable tool to capture, track, and replay errors.

Our solutions team of technologists can provide expert delivery in:

- AJAX Rich Internet Applications
- Enterprise Application Integration
- B2B Integration
- Business Activity Monitoring
- Business Intelligence
- Business Process Management
- Complex Event Processing
- Common Logging and Error Handling (UltimoSoft Errorspot)
- Master Data Management
- Portal
- Service-Oriented Architecture
